FILE REQUIREMENTS

Our production department is Mac-based and uses computer-to-plate technology. We prefer press-ready PDF-X1a files (file must include bleed, trim marks and exact trim size: 9" x 10 7/8").

IMAGES: Photographic images must meet the following guidelines: 300dpi resolution, CMYK or Gray scale (convert all RGB images to CMYK). Pantone (PMS) colors will be converted to CMYK and we will not be held responsible for color shifts due to conversion. We also accept native files created with Adobe InDesign, Photoshop, or Illustrator.

TRAPPING: All items in the document must be trapped to fit. We DO NOT provide trapping, and will not be responsible for undesirable results due to improper trapping.

PROOFS: A color proof of your ad is recommended. Publisher cannot guarantee reproduction of ads without a SWOP industry standard proof. Proofs should be output at 100%. Digital proofs and laser prints are not considered accurate in color and will be treated as "content verification only" proofs. A digital proof must accompany all ad files uploaded to our File Transfer site. A SWOP standard proof should also be sent in the mail. A list of SWOP-certified proofing systems can be found at www.swop.org.

MATERIAL STORAGE: Printing material will be stored for 12 months and then destroyed unless advised otherwise.

Publisher's Protective Clause

The publisher reserves the right to alter or reject any copy which it feels is not in keeping with the publication's standards. Advertisers and/or advertising agencies assume complete liability for all content (including text, representation and illustrations) of advertisements printed and also assume responsibility for any/all claims arising therefrom made against the publisher and agree to hold it harmless.
